Arun Gaddam

Senior UX/Product Designer

Designed applications for both startups and large products with millions of users. I care about designing systems that work, solve real world problems. I'm hands on through the entire process, from research to design. These days I lean on AI to move faster and test ideas.

WORK EXPERIENCE

Planful Software, India

Senior Product Designer I 2025

- Led end-to-end design of two finance planning features, reducing training time ~30% and supporting migration of core finance workflows from legacy tools to a modern web interface.

Reputation.com, India

Senior UX Designer I 2024 - 2025

- Led design across three core product verticals — Insights, Reporting, Business Listings, and Reviews directly supporting primary revenue drivers and AI feature initiatives.
- Designed a unified Competitive Insights workflow that reduced task time by 40%, increased active usage, and contributed to higher customer retention and monetisation.
- Implemented design QA, reducing design defects by ~25% and improving release quality.

Zetwerk, India

Senior Product Designer I 2022 - 2023

- Led product design initiatives for Zetwerk's Order Management System (OMS), improving workflows to support business operations during a ~6× revenue growth phase.
- Mentored three designers and partnered with leadership to establish UX practices (research, concept validation, usability testing), replacing guesswork with evidence-based design, improving product quality and reducing backlog ~20–30%.

FanCode (Dream Sports), India

Manager UX I 2020 - 2022

- Owned UX for a core product initiative, designing multiple features that drove adoption, retention, and growth across a ~50M user base.
- Led research and concept validation to solve new-user retention at FanCode, informing a 12-month roadmap and increasing retention by 18% while boosting subscriptions.

Quazire Consulting

UX Designer (Founder) I 2016 - 2020

SKILLS

UX Strategy

Aligns business goals with user needs, ensuring design decisions are driven by data, insights, and a deep understanding of the user journey.

UX Design

Design seamless and meaningful user interactions with a holistic approach by placing user needs, preferences, and behaviours at the forefront of the creative process.

User Research

Uncovers the needs, preferences, and behaviours of users to gain meaningful insights to influence key decisions.

TOOLS

Design: Figma, FigJam, Miro

AI: Claude, Figma AI, ChatGPT, and Gemini.

Research: Dovetail, Optimal Workshop.
